Hi, I'm Val. Lead Designer.

Who am I?

I'm a computer engineer turned UX/UI designer with a strong eye for detail and a passion for solving complex problems through intuitive design. I've worked across diverse industries—including travel, healthcare, banking, payments, and production—and contributed to AI solutions with the Sabana Herons robotics team and major global brands.

I'm known for my collaborative energy, creativity, and ability to bring clarity to complex challenges. As an engineer at heart, I love pushing boundaries and making technology more accessible, useful, and human.

If you share my passion for innovation and accessibility, I would love to hear from you. Let's join forces and create something truly exceptional.

Education

- Computer Engineering Undergraduate | 2017 - 2022, University of La Sabana.
- Lottie Expert | 2025, LottieFiles
- Foundations of User Experience (UX) Design. | 2022, Google

and more

Skills

Spanish (Native) | English (C1) | French (A1) | Design Systems | Visual Design | AI Prompting | AI Design | UX Design | Research | Figma | HTML, CSS, JavaScript | Design Thinking | Design Ops | React JS | Team Work Spirited | Communication | Leadership

Experience.

Dec 2023 - Present

Senior Designer @ EPAM.

Lead Visual Designer @ Gas Company.

- Supported and evolved the Design System by maintaining component standards, building new components, and managing the library of molecules and templates.
- Led design quality across the team by reviewing all deliverables from five designers and ensuring consistency, usability, and design excellence.
- Defined internal frameworks, workflows, and best practices to improve collaboration, design efficiency, and output quality.
- Translated end-to-end wireframes into polished high-fidelity designs aligned with product requirements and business goals.
- Delivered presentations to clients and development teams, communicating design decisions, updates, and progress.
- Collaborated with the prototyping team to create interactive prototypes used for testing, demos, and development handoff.
- Provided design support throughout the sprint, ensuring smooth handoff and alignment between design, product, and engineering.

Senior Product Designer @ Travel Company.

- Designed and optimized growth and retention experiences across 3 different brands of the company (Web, iOS, Android), directly contributing to 1.6M+ installs and $6.8M+ in GP across key initiatives.
- Led improvements and standardization of all web app-download entry points (banners, interstitials, QR flows), achieving up to 240% uplift in installs and significant increases in Owned Install Rate.
- Designed cross-platform sharing experiences for trips, flights, stays, and activities, which collectively drove 1.48M installs and $14.9M GP by mid-2024, surpassing annual targets by 148%.
- Owned UX/UI for referral program flows, delivering scalable designs that materially improved global performance.
- Introduced and established animated illustrations and micro-interactions for web and mobile, enhancing user engagement and setting new motion standards for the team.
- Developed high-fidelity and interactive prototypes for AI-powered features (personalized profiles, Destination Decoder, AI Agent concepts), enabling user testing and defining new UX patterns.
- Partnered with Research, PMs, Engineering, Marketing, and Content Design to deliver high-impact experiments end-to-end.

Aug 2023 - Dec 2023

Visual Designer @ Globant.

UX/UI Designer @ E-commerce Company.

- Member of three streams and a transversal area of the Growth team.
- Conducted a thorough UX/UI inventory of the entire Figma Library components to identify areas for improvement
- Developed comprehensive wireframes to propose user flows and information architecture, ensuring seamless and intuitive user experiences.
- Conducted client presentations to showcase design concepts and obtain valuable feedback, effectively incorporating client requirements into the design process.
- Created and presented a UI kit to help improve the overall user experience
- Contributed creative solutions and ideas during brainstorming sessions in the three streams
- Collaborated closely with product managers, developers, and stakeholders to understand project goals and user needs, ensuring alignment with business objectives.

Hi, I'm Val. Lead Product Designer.

Dec 2020 - Aug 2023

Visual Designer @ Endava.

During my time at Endava, I have been actively engaged in various internal initiatives. As a mentor for the internship programme, I have had the privilege of guiding and supporting aspiring talents, helping them navigate their professional journeys. Additionally, I have taken on the responsibility of teaching technical workshops, imparting knowledge and empowering others to expand their skill sets. As a leader of a regional technical community, I have facilitated connections and knowledge-sharing among like-minded individuals.

UX/UI Designer @ Endava Website Redesign.

- Designed user flows, wireframes, and high-fidelity prototypes (Figma) while presenting concepts to clients and integrating feedback.
- Applied OOUX principles to create clear information structures and more intuitive, efficient user experiences.
- Collaborated with PMs, developers, and stakeholders, iterating based on research, analytics, and usability testing.
- Built and maintained design systems and pattern libraries to ensure consistency and scalability across products.

Visual Designer @ Banking Company.

- Creating visually engaging designs that convey complex financial information in a clear and accessible way.
- Maintaining the UI kit to ensure visual consistency and adherence to established brand guidelines across all digital channels and platform.
- Staying up-to-date with the latest design trends and best practices to continuously improve the design process and deliver high-quality work.
- Conducting design reviews and incorporating feedback from stakeholders to ensure design quality and user satisfaction.

UX/UI Designer @ Beverage Production Company.

I worked in two phases. In the first phase, I conducted an inventory, created an UI library, and helped connect the design and development team. I supported the business requirements with new features and improved the user experience for existing ones. In the second phase, I led the design efforts to theme the Power BI reports that were going to be embedded in the client's application.

- Collaborating with cross-functional teams, including developers and stakeholders, to ensure seamless integration and delivery of high-quality products
- Creating wireframes, prototypes, and high-fidelity designs for web applications
- Leading the design efforts to theme the Power BI reports and ensure visual consistency with the rest of the product

UX/UI Designer @ Healthcare Company.

- Responsible for designing exceptional digital experiences for patients, healthcare professionals, and stakeholders
- Collaborate with cross-functional teams to define requirements, conduct research, and create user-centric designs aligned with company vision
- Create wireframes, prototypes, and high-fidelity designs for web applications
- Conduct user research, usability testing, and incorporate feedback to improve designs
- Ensure design consistency and adherence to established brand guidelines

Design Intern @ Payments Company.

- Received full design training and participated in a payments client project without supervision
- Conducted a thorough UX/UI inventory of the entire product to identify areas for improvement
- Created and presented a UI kit to help improve the overall user experience
- Contributed creative solutions and ideas during brainstorming sessions
- Gained experience in design software, project management, and client communication
